

ABSTRACT OF THE DISCLOSURE

5

ISOCYANATE-BASED COMPOSITIONS, PROCESS FOR  
USING THEM TO MAKE ADHESIVES, AND  
AROMATIC GLUE JOINTS THUS OBTAINED

- 10 The invention relates to the use of an emulsifiable  
isocyanate composition in adhesives. The composition  
comprises an isocyanate composition with a mass content  
of the  $N=C=O$  function from 10 % to 30 % and a viscosity  
of at most 1,500 mPa.s. and a detergent agent with a  
15 main component of a compound or a mixture of compounds  
containing phosphorous and ethylene oxide groups and an  
oxygen atom carrying an anion. The above is of  
application in the adhesive industry.
